

OAK
EXTRACT

DRAJAURYL® D

**SPECIAL « EQUILIBRE » BLEND MADE OF
NATURAL FRENCH OAK EXTRACTS.**

COMPOSITION

The **DRAJAURYL® D** is produced according to particular and rigorous methods, and made from American oak hearthwood only. The extract thus obtained, contains a high concentration (in powder form) of the same active ingredients as the toasted wood of new barrels, allowing the organoleptic characteristics of spirits to slowly develop.

APPLICATIONS

DRAJAURYL® D is very effective for spirits and eaux de vie aging. It brings the woodiness necessary for the development of the best brandys. With its high concentration in ellagitannins you can :

- Harmonise alcohol taste and color
- Bring roundness and aromatic complexity
- Enhance structure and color
- Develop new qualities of aromas integrating both the new wood of the barrels and the nuances resulting from the classic treatment of heated staves

DIRECTIONS FOR USE

The powder form of **DRAJAURYL® D** ensures, in addition to a very good conservation, an easy handling. Its direct or indirect dissolution is fast and effective. A few grams of **DRAJAURYL® D** are enough to trigger an acceleration of ageing.

Only use distilled water / Do not use iron utensils or containers / Neutralize used barrels by steaming if they are not of American oak origin.

DOSAGE

The principle of application of **DRAJAURYL® D** is based on two fundamentals : the dosage and the duration of storage.

The average dosage (for a minimum of one year of storage, for example) is 1g/degree and per hectoliter in a recently distilled brandy. This dosage is to be modulated according to the storage duration : a smaller dose for a short storage and a dose potentially higher for a long storage.

We recommend that you carry out tests beforehand, in order to define and adjust the dose that will meet your organoleptic objectives for your spirits.

Qualified for the elaboration of products for direct human consumption in the field of the regulated use in oenology. In conformity with (UE) 2019/934.

OAK
EXTRACT

DRAJAURYL® D

**SPECIAL « EQUILIBRE » BLEND MADE OF
NATURAL OAK EXTRACTS.**

PHYSICAL CHARACTERISTICS

Origin	Oak wood (special blend)	Color	Medium brown
Drying	Natural	Odor	Typical of toasted oak wood
Aspect	Fine powder (atomized)	Flavor	Astringent (presence of tannins)
Granulometry	less than 200µ (at 95%)	Solubility	Water or hydroalcoholic medium

EXTRACTION CHARACTERISTICS

Classification	Natural plant extract	Staining adjuvants	None
Solvents used	Water or Alcohol or their mixtures	Conservatives	None
Manufacturing adjuvants	None		

ANALYTICAL CHARACTERISTICS

Total polyphenol content	> = 60 %	Arsenic	< 3 ppm
Loss on drying	< = 10 %	Iron	< 50 ppm
Insoluble substances	< = 2 %	Mercury	< 1 ppm
Ash	< = 4 %	Heavy Metals	< 5 ppm

STORAGE

- Store above ground level in the original packaging, away from light and moisture, at moderate temperatures, in a dry area
- Do not inhale or absorb. In case of a problem, refer to the Safety Data Sheet
- DMD (Optimal date of use) : 4 years

PACKAGING

- kraft drums of 25 kg
